

Company Portfolio

TECHONK SOFTWARE SOLUTIONS Pvt. Ltd

**MAKING COMPANIES A BETTER PLACE,
ONE APP AT A TIME.**

About Us

TECHONK is not just a name, but a leading player in the changing era of software solutions that dedicatedly aims at providing a comprehensive suite of business apps that may be used to support any business requirement. We provide easy access to the software that millions of businesses require to manage and expand their operations in order to grow and prosper in their field.

We are the fastest growing company of Belgium technology with a big tech family and a community of more than **152** active members who developed **30** regularly upgrading main applications and are continuously contributing further towards the development of **4500+** other apps to cater to the wide variety of business' needs.

Great credits to its "On-premise" offering, Techonk is the most widely used business software in the world with over **2000000** people utilising it globally that range from small businesses (1 user) to major corporations (30,000+ users).

Technology Used

Techonk works with cutting-edge technology to ensure a smooth and user-friendly experience and smooth adaptation to all its users. Listed below are some of them:

- **Java** - a general-purpose, class-based, object-oriented programming language designed for having lesser implementation dependencies.
- **Php** - a server side scripting language used to manage dynamic content, databases, session tracking, even build entire e-commerce sites.
- **Java script** - a popular programming language used to create dynamic and interactive web content like applications and browsers.
- **Python** - a computer programming language often used to build websites and software, automate tasks, and conduct data analysis.
- **Objective C** - a general-purpose, object-oriented programming language that adds Smalltalk-style messaging to the C programming language.
- **C** - an imperative procedural language supporting structured programming, lexical variable scope, and recursion, with a static type system that was designed to be compiled to provide low-level access to memory and language constructs that map efficiently to machine instructions, all with minimal runtime support.
- **C++** - a general-purpose programming language created as an extension of the C programming language
- **C#** - a general-purpose programming languages used to create a number of different programs and applications: mobile apps, desktop apps, cloud-based services, websites, enterprise software and games.
- **SQL** - a domain-specific language used in programming and designed for managing data held in a relational database management system, or for stream processing in a relational data stream management system.
- **Swift** - a messaging network that financial institutions use to securely transmit information and instructions through a standardised system of codes.
- **Power bi** - a collection of software services, apps, and connectors that work together to turn your unrelated sources of data into coherent, visually immersive, and interactive insights.
- **Mi365** - the latest microsoft language used to develop websites & applications.
- **Blockchain** - a system of recording information in a way that makes it difficult or impossible to change, hack, or cheat the system.

Products

We create customized ERP automatization products, where you don't have to take the pain of making any single entry as they come with automated sensors. The industry just has to provide the space to let them capture entries automatically. E.g. The marketing sector takes entries directly from calls and logistics take it from sensors & weighing machines.

The solutions we are proud to showcase are-

- **Techonk CRM ERP** - An innovatively evolving system created with fluidity & full integration in order to cover all the needs of the most complex companies.
- **Techonk HRM ERP**- A system automating operational tasks to free HR from performing the big-picture projects that lead to efficient difference in the work and management.
- **Techonk School Management System ERP** - Providing End-to-end solutions to schools with personalized teacher login, principal login, admin login, security guard login & students with GPS tracker for transportation CRP. We have 400+ customers for the same.
- **Techonk Automised Accounting Management ERP** - offering wide-ranging organisational benefits for an enterprise that help it to easily handle accounts in order to achieve its competitive and profit goals.

We have a customer size of a whopping
4000+
 worldwide in every department.
